Tein Barrel Tourbillon

當鐘錶大師遇上機械師，便會令人想入非非，究竟什麼樣的鐘錶能夠同時兼顧收藏價值與實用功能，而能同時具備這兩者之功能，這便需要鐘錶師在專業知識及技巧之外，亦具備極強之藝術修養與天賦。來自瑞士的鐘錶製造商 Azimuth 便是其中一個。Azimuth 的「Tein Barrel Tourbillon」系列鐘錶，其設計靈感來自於「天球」，即「可變速時鐘」，旨在以一種獨特的方式，將時間與空間、時間與動力、時間與藝術完美地結合在一起，創造出一個全新的鐘錶世界。

這個系列鐘錶的每個鐘錶，其設計均經過精心設計，其設計靈感來自於「天球」——一個在一個小時內旋轉一圈，以顯示時間的鐘錶。它是一個獨特的鐘錶，其設計與「Tein Barrel Tourbillon」系列鐘錶，其設計靈感來自於「天球」，即「可變速時鐘」，旨在以一種獨特的方式，將時間與空間、時間與動力、時間與藝術完美地結合在一起，創造出一個全新的鐘錶世界。

This Singapore-born master left these getting better, turning up real surprises so often that collectors will really have to be on their toes if they wish to catch up! From its founding in 2004, which initially saw the brand parking one somewhat-unconventional watch, Azimuth has quietly moved on to make a name in the field of quirky watches over last year's little Rolex which launched a rather novel dial complete with separate indicators for its 'year' and 'month', and this year's SP5 Repeater which lets the wearer indulge in a game with every press of the crown. But do not think that it's all baby for indulgence with the Approach tour.

The Tein Barrel Tourbillon is a stellar achievement, especially when one takes into account that brands with longer histories and production programs have struggled to come up with a tourbillon complication of their own. Key to this finer watchmaking watch is a blend of innovative design and traditional craftsmanship - the former exemplified by a really fine display by way of two rotating stainless steel discs covering a 100-degree minute arc, and the latter with its tourbillon mechanism at 6. Unlike many other tourbillon watches which prefer to look static, this baby is young, both in spirit and in with a voluptuous titanium case followed by a single block of titanium to make the back and look of a very automobile. And to show that it's not all style without substance, the watch allows really get's ingested into the complexity with a shock absorber for the tourbillon and thought-then-right watchmaking. Available in limited edition of 25 pieces.
