Mr Roboto

A Unique Timepiece by Azimuth

The design of Mr Roboto is inspired by the Lantern Robot of the 1950s. Azimuth's designers show that a timepiece's practical functionality does not have to take a back seat to aesthetic visual designs. Mr Roboto is powered by a modified ETA 2836-2 movement. The robust case is forged out of hardy steel blocks with a warm touch of beveled edges at the sides of the tonneau shaped timepiece.
